

## BUSHFIRE IN TASMANIA

A new approach to reducing our Statewide relative risk.

July 2014

### ACKNOWLEDGEMENTS

The contribution of the following individuals in preparing this document is gratefully acknowledged:

*Rochelle Richards, Samuel Ferguson, Kylie Cornish, Sandra Whight, Grant Williamson*

The authors are grateful for the knowledge and valuable guidance provided by Andy Ackland, Andrew Blackett, Gordon Friend, Jaymie Norris, Frazer Wilson and Jill Gallucci from the Department of Environment and Primary Industries, Victoria; Information Systems Branch, Tasmania Fire Service; Luke Wallace; Fire Management Section, Parks and Wildlife Service; Professor David Bowman from the School of Plant Science, University of Tasmania; Dr Stephen Bresnehan from the Open Space Group, Hobart City Council; Box Knox and Peter Rowlands from Northern Region, Forestry Tasmania.

Advice and/or support were readily provided by individuals, organisations and staff from Community Fire Safety, Tasmania Fire Service; Canadian Forest Service; Land Conservation Branch, DPIPW; Derek Ming Onn Chong, University of Melbourne; Emergency Service GIS, DPIPW; State Operations, Tasmania Fire Service; Local Government Association of Tasmania.

*Maps contained in this report may include data provided by DPIPW (Information and Land Services Division (ILS), and Parks and Wildlife Service Fire Management Section), and State Fire Management Council. These map products have been produced by the State Fire Management Council. While all efforts have been taken to ensure the accuracy of these products, there may be errors and/or omissions in the data presented. Users of these products are advised to independently verify data for accuracy and completeness prior to use.*
